Profile

My passion for programming began two years ago, since then I have gained new knowledge in this field every day. My favorite language is JavaScript and everything associated with it.

Work experience

10/2019 - Actually

Full Stack Web Developer

Assembler School of Software Engineering, Barcelona, Spain

Full time 9-months intensive programing based of AGILE methodology building real world web applications based on HTML5, CSS3, Sass, JavaScript, Node.js, Express.js, Puppeteer, Vue.js, React, PHP, MySQL, MongoDB, RESTful APIs, MVC pattern and Git/GitHub.

Projects:

The real estate application, user can filter posts, publish posts with images, edit posts, check property on the map, send messages, login, register, update avatar and add post to favorites. Created with back-end: Node.js, Express.js, JWT, MongoDB, Node-Geocoder, Cloudinary, ESLint, Swagger. Front-end: React, mapQuest.

Scraping application, created for automatically generate and store data in database with images in MongoDB and cloud service. In this application I was used Node.js, Puppeteer, MongoDB and Cloudinary.

Music library application, consume iTunes API. Users can search songs by name, artists, albums and videoclips, filter by country, by explicit content, and choice result limits. Created with JavaScript, jQuery, AJAX, JSON.

Blog application, using PHP, MySQL and MVC pattern. Users can create, edit, update and publish articles, can login and logout, search for a post by title and contents.
